TO Perry Huston
Planning Division
Okanogan County.

Dear Sir

I am writing to you expressing my view against the new County Comprehensive Plan that will be approved by the commissioners
I am against the rezoning of the lower Methow Valley into smaller 1 acre plots with more development.
We do not need another Wenatchee here in this grand and beautiful valley. Water is a limited resource and the infrastructure to handle increased traffic and increased density is not adequate.
There is not enough fire or police protection to handle the increase development or population that will occur with rezoning
Why increase density for the sake of development and developers when they take the money and run and leaves all the upgrades and maintenance to the county which has no money.
Adding increased density and development will not solve the shortfalls in tax revenue but only lead to further problems of funding water, sewer, school and road requirements
Just say no —

Thank you
Michael Rael
