**Subject:** Proposed Zone Code Comments

I want to voice my concerns over the proposed zoning revisions for Okanogan County, especially in the Methow area. I hope to attend tonight's public meeting, but will briefly say:

The draft zoning code allows for too great a density of residences to be supported by the available resources. The issues of water availability/allocation and wildfire protection have not been adequately addressed for the density of dwellings allowed. Please change the draft zoning code to be more realistic about these issues.

Thank you, David Clement.
