Subject: further expansion of existing pot farms
To: ldavidson@co.okanogan.wa.us

It is extremely critical that stricter rules be placed on pot farms that are in residential areas of Okanogan County. The skunk smell and offensive lighting emitted by these farms is incompatible with residential living. The pot farms may be revenue producing operations but at the same time cause a substantial decrease in property values of nearby residential homes. The pot farm located on Wolf Creek Road immediately outside of Winthrop needs to be prevented from doubling its size this spring unless it can come up with a way to prevent its skunk odors from sickening all the nearby neighbors. Due to its close proximity to residential homes, it should never have been allowed to be developed in the first place and should definitely be stopped from further expansion.

Thank you for your help in this matter. Please keep Okanogan County a beautiful place for residential living and only allow pot farms in areas far from residential development.
