Subject: Treat Cannabis as AG

Good morning, Mr. Davidson,

A possible solution to the issue of marijuana cultivation in OK could be to create a county license and limit the licenses to the 60 (or so) licensees and applicants that are already in the LCB system and have already put their life savings into their cannabis business in OK. You could make it a \$1000 if you chose to and bring in some funds for projects the county is working on.

This way, you do not ruin those that are already settled on a property in OK and address the opposition's fears that the county will be over-run with pot farmers. 60 of the largest growers is only about 40 acres, after-all.

And, please alter your definition of agriculture in your county to not exclude marijuana.

I have family over there that are in the process of getting their license and have invested heavily so far in the set up; this helps support so many residents of the county and I hope you move forward with support of local employment and economic prosperity as a heavy weight upon your decisions.

Thank you,
Shawn DeNae
