Subject: Keep Cannabis agricultural in the Okanogan

Hello commissioners,

I spoke briefly at the March 28th meeting. I am looking forward to a successful business venture in the great Okanogan and strongly believe that the evidence supports the fact that the I-502 enterprises are and will continue to make a difference and improve the opportunities for economic growth. Together, we can become leaders in the nation for sustainable growing. With the abundance of sunlight and the availability of solar technology we can be an example of best practices.

Please stay the course and maintain the position that cannabis is an agricultural crop. Let's find another way to deal with citizen complaints and look for positive growth. Please keep the opportunities first created alive and well.

Kind regards,

Suzanne Cheney
