Subject: May 3, 2016 follow up

Good Afternoon Commissioners!

I would like to provide follow-up regarding the number of marijuana producers and processors in the county that was discussed on Tuesday May 3, 2016 at the public hearing for the continuation of the marijuana moratorium. Here's the link to WSLCB website where this information can be found under 'Marijuana License Applicants': <http://www.liq.wa.gov/records/frequently-requested-lists>

As you can imagine, there are many licensees across the state, so I searched for Okanogan County and sorted by license status which are: Active(issued), Pending (issued), Pending(not issued) and closed licenses. One grower, ALON on Omak River Rd., has a license with a status that is closed, but if you look at CannaMed with the same address they have a Pending (issued) license. I bring this up after testimony that there are only 9 producers waiting to be licensed in the county. According to WSLCB spreadsheet, there are potentially 51 more licenses pending (not issued), and some of those licensees are already license holders (K&M growers and Cannasol Farms). Are those pending (not issued) licenses for expansion? If they have licenses why aren't the pending (not issued) licenses closed like in the case of ALON? I've also added a tab about local marijuana processors to the spreadsheet. As you can see, there are 56 issued processors (most of them also being producer license holders), but according to WSLCB website there are also 27 pending (not issued). Why are those still open if WSLCB isn't going to issue more processor licenses? These are questions that need to be answered, so you can make an informed decision for the county now, but will also protect us in the future.

One final thing I'd like to mention is that marijuana producers are not farmers. Not only does RCW 82.04.213 "Agricultural product, "farmer", "marijuana" state that an agricultural product does not include marijuana, useable marijuana, or marijuana infused products, but marijuana producers require a WA state license otherwise they are committing a criminal offense. The same can not be said for someone who is producing something like alfalfa.

Thank you for your time,
Stacey
