**Subject:** Marijuana-In Support

Hello,

I am the emerging owner of a I-502 cannabis store and I am writing to you to urge the planning commissioners to maintain the definition of marijuana as an agricultural crop, continue to allow for permitted-use in all zones, and to remove the amortization language that would force all existing operators to cease operations January 1, 2017.

The cannabis industry has a positive impact to contribute to your county and businesses like mine are dependent on farmers in your community to bring adequate and quality product to our market. Please find a pathway for supporting this industry in its growth & production without putting additional barriers in their way.

Thank you.

Jenny Carbon
