**Subject:** Comprehensive plan

Perry Huston, Planning Director

Thanks for the opportunity to comment on the comprehensive plan.

The state of Washington has classified the Methow River as AA and A. I am concerned that the level of development that will be allowed in the proposed comprehensive planning document will degrade the precious water quality of the Methow River.

I question if the proposed plan were implemented. That the rural and agriculture character of Okanogan County will be adversely affected. The lower Methow needs a far better plan than that is now proposed.

Sincerely

Richard Murray
