Subject: Comments of County Comprehensive Plan

The implementation of this plan will have a probable, significant impact that is adverse to the Methow Valley environment. For instance, the measures that need to be taken to ensure adequate water supply for the proposed density are not clearly specified. Also, protection for the groundwater needs to be clearly stated and incompatible uses be eliminated from the plan.

Thank you for keeping the existing zoning for the Upper and Middle Methow Valley intact, and we urge you to respect the roles of citizens, advisory groups and communities in shaping the Comprehensive Plan.

Thank you for considering these views.

Karen Edwards and Tom Ise,
residents of the Methow Valley
