**Subject:** Okanogan County comp plan scoping

Hello,

Thank you for the opportunity to submit scoping comments for the Okanogan County comp plan EIS.

I would like to encourage the county to address:

- Water quality
- Water quantity
- Air quality, including impacts of woodstoves and outdoor (yard waste) burning
- Shoreline protection
- Channel migration zones
- Wildfire, including related impacts such as flooding and landslides
- Impacts of vacation housing, including water use by part-time residents
- Critical areas, including using BAS to designate and protect aquifer recharge areas
- Views
- Light pollution
