Subject: County Comprehensive Plan

The following are my “scoping” comments for the EIS on future growth and land use in our county.

The EIS must use the best and most recent science available in analyzing the future impacts of the Comprehensive plan regarding all issues such as economy, fire, water and our wildlife. It also must have a plan to reduce health risks to the people of Okanogan County. It must analyze which proposed alternative includes good escape routes in case of wildfires and ensure people don't build in high risk areas for wildfires. And which alternative has the least impact on our migratory animals which is a huge asset to the area for hunting and the enjoyment of people.

Thank you,

Deirdre Cassidy
