**Subject:** Okanogan County comprehensiveplan

I would like to raise a few concerns on the proposed rewrite of our counties comprehensive plan. Does the plan really address the water issues our county is facing with lower snow pack from climate change and the demand for new housing. Does the plan address the fire threats and the continued destructive fires we have had and will continue to have in the future. Does the plan address the salmon recovery plans and mitigation that our county will face In restoring fish habitat. These are a few of the hurdles that Okanogan County will face today and tomorrow and for many many years. Thank you. Mike Real Winthrop Washington
