Subject: scoping comments for comp plan eis

The Comp Plan EIS should be meaningful evaluation, not just going thru the motions. Impacts from all proposed alternatives should be included and addressed.

As I've submitted before, wildfire and related topics definitely must be included, as well as water quantity and quality, air quality, agriculture and forestry resources, wildlife and critical areas protection.

Okanogan County has opportunity to move toward a better outcome than has occurred in multiple other places due to unplanned or poorly planned development. Let's make a difference.

Sincerely,
Susan Crampton
Twisp, WA
