Subject: Okanogan County Planning Department on the scope of the Environmental Impact Statement (EIS) for revisions to the 2014 Okanogan County Comprehensive Plan and Zoning Regulations.

Dear Mr. Huston,

I am writing to support alternative 4. I believe this is a thoughtful, well-formulated plan for the Okanogan valley that takes into account the possibility that climate change will significantly impact the amount and quantity of water available for agricultural and domestic use. The Okanogan valley is too great a resource for the entire state of Washington to risk putting at risk its attributes that contribute to a healthful and economically valuable landscape.

Sincerely,,
Ted Young, resident of the Methow Valley
