Subject: comment on proposed marijuana zoning regulations

Hello,

If it's not too late, I would like to submit a comment on behalf of myself and my husband regarding the proposed marijuana zoning regulations.

We are in favor of limiting marijuana farms that use lights at night to areas that are located away from residential and recreational areas. Alternatively, such farms should be required to turn off their lights at night or cover their greenhouses with a dark material to keep the light in.

We moved to the Benson Creek area, south of Twisp, two months ago from Seattle in search of peace and quiet and starry skies and were dismayed to see that the marijuana farms located just down the road kept their greenhouses lit at night. This practice creates light pollution that is detrimental to both people and animals. It is reducing our ability to enjoy the outdoors as well as our ability to enjoy our home as we can see the greenhouses and the glow from our windows at night.

Thank you for your consideration of these comments.

Sincerely,
Irina Vodonos & Sergey Kushnarev
189 Benson Creek Dr, Twisp, WA 98856
