Subject: Comp plan comment

The Draft Comp Plan in its current form is insufficient and does not address the issues raised by the public during Scoping. The DEIS does not adequately compare alternatives. From what I can infer from the documents provided, parts of Alternatives 3 and 4, though incomplete in the DEIS, are the most viable approaches because they:

1. Concentrate most growth closer to towns
2. Take a conservative approach to addressing water supplies
3. Conserve natural resources and promote land uses that support local agriculture
4. Encourage resilience to wildfires and other impacts of climate change
5. Protect wildlife and migration corridors and consider our important mule deer population
6. Minimize conflict between residential and other uses of Rural lands by creating different designations
7. Improve and enhance recreational opportunities

I support sub-area planning, guided by local advisory committees, that recognizes the unique culture and geography of our large county.

I support including the entire Methow Watershed within the Methow Valley More Completely Planned Area (MVMCPA)

Thank you.
