

Sept. 12

Dear Ms. Inglen and Planning commission,

As a seventh grade student at Liberty Bell junior-senior high I encourage you to consider the proposed fourth alternative. As a youth I'm concerned about the future, and what the valley will look like in 25 years. Every Summer our valley is filled with smoke. It is unsafe for youth to venture outside, masks are encouraged and our windows stay tightly shut. Many of my friends houses have burned or come close to. The 2014 comp fails to commit the County to less flammable material in new construction. This is a lose for everyone because there are now citizens without homes and this exacerbates the housing crisis in our county.

Additionally I think that the County needs to do a better job of addressing water. I would encourage the comp plane to Concentrate development in towns. This would preserve water and open space.

Please consider the proposed fourth alternative.

Sincerely,  
Clover Thrasher
