Subject: Comprehensive Plan and DEIS Comments

I wish to support the Citizens' Alternative for the county Comprehensive Plan.

I feel the plan should include protections for water, wildlife, natural resources, forests and agriculture.

It should concentrate growth and development near the towns and include the entire Methow river-shed.

It should include support for sub-area planning, and protections from wildfire, as well as a plan for natural disasters.

Economic development should be addressed, as well as increased recreational opportunities.

And the plan should be integrated with the county road system.

We have an opportunity now to ensure that our county remains a good place to live and visit if we are not too short sighted! More foresight now will reap many future dividends!

Please listen to us who live here and love this Valley! PLEASE!
