Subject: Comments re: Okanogan County draft Comprehensive Plan

Dear Members of the Okanogan County Planning Commission,

I am writing you concerning the Draft Comprehensive Plan and associated Environmental Impact Statement.

Thank you for previously extending the public comment period tp Sept. 19.

Herewith are three comments for your consideration.

First and most importantly, I strongly support bringing in an outside consultant who can provide expertise and structure in drafting a revised plan with the objective of making the revised comp plan legally defensible and saving the ucounty future legal challenges.

Second, I strongly support incorporation of agriculture and forest conservation into the plan with the goal of limiting intensive residential and industrial development.

Third, I strongly support incorporation of conservation of existing water resources with the goal of limiting the transfer of water from current agricultural uses to rural residential development outside of towns and designated growth areas

In conclusion, I thank you for your time and consideration of my comments.

Sincerely,

Sherrie Krown
