Subject: Comp plan

Dear Mr. Ingle,

The Comp Plan and DEIS are grossly inadequate to address our County as we move forward into the future. The plan should address the following:

Wildfire - encourage or require new construction to use nonflammable materials, hardening of existing homes, and other Firewise techniques.

Ridge Top Developement - please limit

Climate Change - use the latest information on how climate change will affect the County.

Sub area planning should be encouraged.

Recreation needs to be addressed.

Working farms/ranches need to be protected and developement limited to around existing towns.

Fish and Wildlife - critical areas need to be protected, including flood plains, wetlands, fish and wildlife conservation areas.

Please look at Alternative 4 and implement those suggestions.

Thank you
