Subject: County Comprehensive Plan

I wish to convey my feelings about the Comp Plan process so far. The Comp Plan and DEIS fail to meet the basic standards required by law. It does not deal adequately with sub-area planning. It has inadequate provisions for instream flows and water quality as well as fire protection. The current Draft Comp Plan does not address issues raised during the Scoping process.

I recommend the county hire a professional to assist in drafting the final Plan and EIS.
Thank you for considering these views and entering them into the record.
Karen Edwards and Tom Ise
