Subject: Comprehensive Plan.

I bought and maintain property in the Lower Methow for recreation, wildlife viewing and outdoor activities. I'm not a advocate of significant change. Due to water availability a 20 acre per home seems way more realistic than the old 1 acre or the current 5 acre requirement. Housing density, along with industry should be restricted to the areas with water availability to make growth feasible. Don't allow scatter in the open space, low density water restricted corridor of the Lower Methow Valley. Michael
