Subject: Comp Plan

To whom it may concern: Sept. 17, 2019

1st, as a full time resident, and hopefully all full time residents our thoughts and emails should have priority, over those who vacation or visit our area for short times (some cases may have never entered the county) as they may not depend on our county for their livelihood or need the services provided by our county daily, weekly or annually.

This being said:

After reviewing and comparing the options being presented for Okanogan County's Comp Plan. I would prefer that no changes be added to the 2014 Plan, however if the adoption are necessary, Alternative plan 2, would be my 2nd choice, to be added to the 2014 Okanogan County Comp Plan.

Alternative 2 will meet and support the water, agriculture, and forestry needs without impacting growth and expansion of our Rural and City zones. Our Tax base has been greatly impacted, due to the sale of private properties to either State and Federal programs or conservation easements. We need to encourage private growth, for a stronger County and the future and families whom have chosen to live here.

Thank you,
