Subject: Okanogan County Planning Commissioners

Dear Okanogan County Regional Planning Commission,

Thank you for the opportunity to comment on the recent draft of the Comprehensive Plan for Okanogan County. I encourage you to take the time to look at all the community feedback that you have received over many years. I hope you can oversee a process that acknowledges that change is inevitable and with a well-crafted comprehensive plan, give us an opportunity to guide or react to the forces of change that best address the needs of our community.

I believe the first step is to hire an experienced professional to pull together in an organized way with a basic Table of Contents that follows the existing laws. This will simplify keeping it up to date and avoid costly legal actions in the future.

Its obvious the most important issue is water supply, both in stream and ground water. Another issue new to the valley is wildfires. The plan should address roads and egress which become critical in emergency situations.

Thank you for listening and for the work you are doing. I hope you will consider all the comments from people in the community who love this beautiful valley and want to protect for the future generations.
